Seminar on Igniting Change: Showcasing Successful Initiatives for United Nations Sustainable Development Goals (SDGs)

The <u>United Nations Sustainable Development Goals (SDGs</u>) have served as a comprehensive blueprint for addressing the most critical and prioritised challenges facing our planet by 2030. These 17 interconnected goals encompass different issues, including poverty eradication, clean energy, responsible consumption, and climate action, etc. Green Council encourages organisations to embed SDGs as blueprint in their corporate strategies and initiate projects for addressing these challenges.

To meet SDGs, it is crucial to learn from the successes and best practices of organisations who have made significant contributions towards achieving these goals. Green Council will organise a seminar aims to showcase a diverse range of campion initiatives and projects that have successfully made a positive impact in various areas.
